Builder: John Hueber Homes
LEED for Homes Provider: Alliance for Environmental Sustainability

Re: Home Certified at:
2573 Observatory Avenue
Cincinnati, OH

Dear new LEED for Homes owner,

On behalf of the board of directors, the members of the U.S. Green Building Council, and the LEED for Homes Committee, I would like to congratulate you on your new LEED-rated home! The U.S. Green Building Council is proud to recognize the efforts and accomplishments of your homebuilder and project team by awarding the Leadership in Energy and Environmental Design (LEED®) Certification for Homes to your home located at 2573 Observatory Avenue, Cincinnati, OH. Your LEED home has undergone third-party inspection and performance testing, and it is certified to be higher-performing than conventional homes. Your home's final LEED rating corresponds to the LEED for Homes pilot "LEED Silver" certification level.

In honor of this achievement, we are pleased to present you with the enclosed certificate. Your home has earned this recognition for excellence in residential construction and a place among the finest measured green homes.

Your home has many high performance features built into it that may provide improved health, safety, comfort, and lower operating costs. LEED-rated homes benefit residents directly because the LEED Green Building Rating System™ incorporates 10 mandatory measures related to occupant health and well-being. In addition, the mandatory energy-related measures ensure at least 20-30% energy savings (relative to the national energy code). Additional energy measures can result in 30-70% reductions in energy costs. Your LEED home is also more environmentally friendly, more durable, less polluting, and makes substantially better use of resources. Moreover, these features of your LEED home may increase its value.

Please contact your builder or LEED for Homes Provider if you have any questions on the maintenance of your new home's features. For more information on LEED for Homes, you can visit our Web site at www.usgbc.org/leed/homes.

Along with the rest of the USGBC and LEED for Homes team, I congratulate you again.

Sincerely,

S. Richard Fedrizzi
President, CEO, and Founding Chairman
